NNK12443398E – Replace Air Handling Units, Space Station Processing Facility, PCN: 98946.2

ANSWERS TO BIDDERS QUESTIONS:

- 1. REFERENCE:** Mechanical schedule page M-601 Air handling unit schedule box “Basis of Design Manufacturer & Model No” as “Temtrol Series WF”

QUESTION: No other manufacturers are listed. Climatecraft will meet the intended performance and specification for this project. Please confirm that Climatecraft is an acceptable alternate to basis of design.

RESPONSE: Other manufacturers with products fully meeting the contract drawing and specification requirements are acceptable.

- 2. REFERENCE:** Specification: 237313

QUESTION: Will the owner allow other manufacturers of air-handlers for this project, or is Temtrol the ONLY equipment to be provided?

RESPONSE: Other manufacturers with products fully meeting the contract drawing and specification requirements are acceptable.

- 3. REFERENCE:** Section F Item F.5 Operational Work Area Access Constraints

QUESTION: The outage work window for air handling units 3 and 25 is December 1, 2012 through January 2, 2013. The outage work window for air handling units 4 and 26 is February 15, 2013 through March 15, 2013. Sealed offers are due by 3:00pm local time on 09/14/2012. Per the solicitation, the Government can take up to 60 days for acceptance and award of contract. If the Government awards the contract with a notice to proceed 1 week later on 09/21/12, the air handling unit submittals will take 2-3 weeks to receive from the manufacturer, which would be roughly 10/15/12 to submit for Government approval. The Government has 7 calendar days to review submittals after date of submission per section 01 33 00 paragraph 1.12.1. Once the air handling unit submittals have been approved, the fabrication of the units is 12 weeks. This would place the air handling units at the jobsite during the week of 01/21/12 missing the outage work window as specified in the contract documents. Please confirm the dates for the outage work windows are correct.

RESPONSE: The dates of the outage work windows provided in the solicitation are correct. To shorten the submittal approval turnaround time the government has requested the proposed AHU cut sheets be provided in the Project Execution Plan requested in the solicitation package so that a

timely AHU submittal approval can be provided after award. In addition the government expects a priority/ rushed delivery of the AHUs may be required to meet the outage dates.
